AVIGILON™

Single Door Controller

Expandable access control for the modern workplace

Avigilon Alta access combines sleek hardware with cloud management and an easy-to-use mobile app, enabling secure remote monitoring and management for operators and streamlined mobile access for credentialed users. The Single Door Controller is a compact access control unit (ACU) for up to two entries and two Avigilon readers. Using Power-over-Ethernet (PoE or PoE+) for power simplifies installation, making it ideal for small offices or decentralized deployments. The Controller securely makes all entry decisions and it's easily set up using the Avigilon Alta Access app.

All-in-one device

Eliminate the need for additional hardware and centralized wiring with the Single Door Controller. This compact ACU supports two readers, two doors, and associated relays and sensors, with power.

Simplified wiring

With wired or wireless options and PoE for power, the Single Door Controller streamlines installation. Connect to Readers with CAT 5/6 cables and industry standard RS-485 signaling for communications.

Flexible install options

The Single Door Controller can be wall mounted or installed on a single or double gang box, and powered using PoE, PoE+ or an external 12V to 24V supply, making it easy to install almost anywhere.

High-performance hardware

The Single Door Controller uses a next-generation hardware platform with faster processing speeds, more RAM and better support for our 64-bit operating system, enabling future-proof capabilities.

Easy management and monitoring

Software runs in the cloud for easy, secure access and remote monitoring, without the need for local servers. Built-in diagnostics and real-time troubleshooting insights streamline management.

### Lifetime limited warranty

Ensure peace of mind, knowing that Avigilon stands behind its access control hardware with a lifetime limited warranty, guaranteeing the quality of your security solution.
