

PXO COMPACT POWER DISTRIBUTION

The PXO-line of compact power distribution units (PDUs) provides intelligence, visibility, and control to locations that are not readily available by IT and AV personnel.

Now, you can get the same power reliability, security, scalability, and feature-rich management options as a traditional data center for your IT and AV applications.

Remote Power Cycling to Outlets

Remotely switchable outlets allow for power to be cycled on/off to a specific outlet, reducing operating expenses by not having to send IT personnel to reboot equipment and reducing energy usage by switching off equipment when people have vacated a building.

Compact Power Distribution

The slim form factor is perfect for local AV and IT applications such as conference rooms, board rooms, offices, retail POS, education, AV racks and hospitals.

PXO-2401CR	
Dimensions H x W x D (mm; in)	44 x 220 x 133 mm 1.7 x 8.7 x 5.2 in.
Voltage	200-240V
Inlet Type	IEC60320 C20
Included Cord	IEC60320 C20
Outlets	4 x C13 (Locking)
Rated Current	16A
Capacity	3.2-3.8 kVA
Surge Protector (Joules)	250J
Warranty	2 year Warranty
