Pro Series

ENERGY SAVING

ECO MODE

MeetingroomCare* protects users' health and vision: The certified **germ-resistant coating** is applied on the front ports, pens, remote controls, and screens. Plus, RP03 delivers optimal colour performance thanks to its **low blue light** feature, which makes it the world's first interactive display approved by **Eyesafe®**.

With the built-in **air quality sensor** and **air ioniser**, meeting rooms can both be monitored for pollutant particles and cleansed by negative ions that are released automatically or remotely via DMS.

With the **dedicated USB port for cameras**, RP03 Series allows remote participants to see every attendee in the meeting room during video conferencing.
