

Yealink CT200 Datasheet

Device Navigator

The CT200 is a powerful Device Navigator that enables seamless management and monitor of room devices, including AVoIP, cameras, audio, and more. With advanced room control capabilities, such as routing AV signals and managing display power, it delivers an automated, tailored experience for any room configuration.

Key Features and Benefits

Efficient Management with Dual Network Ports

With two network ports, the Yealink CT200 enables the separation of management and device control, ensuring secure, efficient network traffic and better overall system performance.

Effortless Third-Party Integration via Open API

Yealink empowers seamless third-party device integration with its powerful Open API capabilities, enabling flexible and customized solutions.
