

Alta Arming Station Pro

Get improved authentication and security measures with a dedicated arming station

Quickly and securely arm and disarm your cloud-native Avigilon Alta Protect system with the sleek, powerful Alta Arming Station Pro. It is designed to work with the Alta Protect web app, making it easy to use while ensuring your people and places are protected.

Intuitive, easy-to-use design

With a 2.8" IPS LCD display and dedicated buttons, the Arming Station Pro can be installed near the entrance for easy arming and disarming the protection zone.

Tamper protection

Help ensure tamper protection and peace of mind with the Arming Station Pro's embedded 3-axis accelerometer. Set up alerts to get notified if tampering is detected.

Powerful audio capabilities

Help detect and deter threats before they escalate with audio analytics via embedded dual microphones. Use the loudspeaker to activate sirens and alarms to deter potential perpetrators.

Advanced user authentication

Arm and disarm the system securely with access cards, fobs, or PIN codes for user verification. Turn on multifactor authentication for an added layer of security.

Enhanced visibility

Visually verify who is arming or disarming the system and investigate tampering and failed user authentication with the embedded 2 MP camera. Set notifications for added visibility.
